ABOUT ME

I'm Janice Magdalene D, 2025 Computer Science and Engineering graduate from Sri Krishna College of Technology, Coimbatore, recognized as Top Performer (2024–25). Completed internships at Accenture and Azentio Software Pvt. Ltd., contributing to core digital banking project and medical project. Developed an elderly care application recognized as one of the top three in class and certified under IAMNeo. Skilled in Java and developed projects like Verbal Abuse Analysis using Bidirectional LSTM. Also published research article in the International Journal of Science and Research and participated in hackathons. Currently pursuing an online PGDM (AI/BA) at Great Lakes Institute of Management and certified as a ScrumMaster (CSM).

SKILLS

Technical Skills: Java, React.js, CSS, SAP SD, AWS, Testing

Soft Skills: Leadership, Teamwork, Decision making, Communication, Multitasking

EDUCATION

GREAT LAKES INSTITUTE OF MANAGEMENT

Online PGDM in AI/BA

Tamil Nadu, India

July 2025 - Present

SRI KRISHNA COLLEGE OF TECHNOLOGY

B.E. in Computer Science and Engineering

Cumulative GPA: 8.99/10 (Academic Topper 2024-2025)

Tamil Nadu, India

Oct 2021 - Mar 2025

STANES ANGLO INDIAN HIGHER SECONDARY SCHOOL

Computer Science

Percentage : 95.18%

Tamil Nadu, India

June 2020 - May 2021

WORK EXPERIENCE

Azentio Software Private Limited, Bangalore

Intern

Nov 2024 - June 2025

- During my internship at Azentio, I contributed to a digital banking project by performing functional testing and logging issues using JIRA. Actively contributed to Agile team activities, including sprint planning and daily stand-ups.

Accenture, Bangalore

Packaged App Development Associate Intern

May 2024- July 2024

- During my internship, I learned SAP SD module focusing on billing and ordering management. Also gained insight about overall SAP modules.

YBI Foundation , Delhi (Online)

Data Science and Machine Learning Intern

June 2023- Aug 2023

- During my internship, I learned how to use powerful machine learning models like Random Forest and Linear Regression. I applied these skills to create advanced movie recommendation systems.

PROJECTS

MOVIE RECOMMENDATION SYSTEM

Dec 2023

- The project was developed in Python that deploys Collaborative and Content-based filtering to recommend movies based on a user's favorite input.

ELDERLY CARE NETWORK APPLICATION

Mar 2024

- Developed an Elderly Care Network application using React and Spring Boot, featuring CRUD operations and dual user roles. Integrated services like chatbots, email.js and responsive in all applications to enhance user interaction and support.

VERBAL ABUSE ANALYSIS

Dec 2024

• Developed a Python-based system for detecting hate speech in text and speech inputs using NLP techniques and a Bidirectional LSTM model, integrating speech recognition and real-time predictions through a Flask web interface, stored data in MongoDB and hosted in AWS.

INFORMATION QUALITY ANALYSIS IN E-COMMERCE REVIEWS

Mar 2025

• Developed a Python-based system to evaluate the trustworthiness of online product reviews using E-A-T principles, Natural Language Processing, and machine learning models for quality analysis.
